Availability: June 2016 **Price:**

Product Description

The Logitech® K780 Multi-Device Wireless Keyboard redefines what a desktop keyboard can do, letting you easily type on – and switch between – three connected devices, whether Windows® or Mac® and Android™ or iOS. You can write an email on your computer then touch an Easy-Switch™ button to reply to a text message on your phone or tablet. The keyboard design and layout, PerfectStroke™ keys and 10-key number pad provide a comfortable and familiar typing experience, while the integrated cradle holds your mobile device at a stable reading angle. The K780 Multi-Device comes with a Logitech Unifying™ USB receiver or *Bluetooth*® Smart technology so you can choose the best way to connect.

Key Features

- Type on anything: The K780 Multi-Device is compatible with any computer, smartphone or tablet. Start typing on your computer, then switch and type on your phone or tablet – at the touch of an Easy-Switch button.
- All the keys you need, with PerfectStroke typing: Experience quiet and comfortable typing with large, carefully crafted concave keys in a full-size and familiar layout, including a 10-key number pad.
- Mobile device cradle: An integrated cradle holds a variety of devices – from smartphones to the iPad Pro™ – at the perfect reading angle.
- OS-adaptive: The K780 Multi-Device adapts to the operating system that is connected, and automatically maps keys to supported functions and shortcuts.
- Dual connectivity: With the K780 Multi-Device, you can choose the best way to connect the device. It comes with a Logitech Unifying USB receiver and *Bluetooth* Smart technology.
