

Annex – Product Overview

1. **GoGoEnterprise** is an intelligent platform that empowers businesses to manage multiple transportation or delivery orders more efficiently. The dynamic route optimisation algorithm will map out the best routes by calculating factors such as the delivery time window, geographical zone, item size and traffic. This product can help businesses to save time and operation cost tremendously.

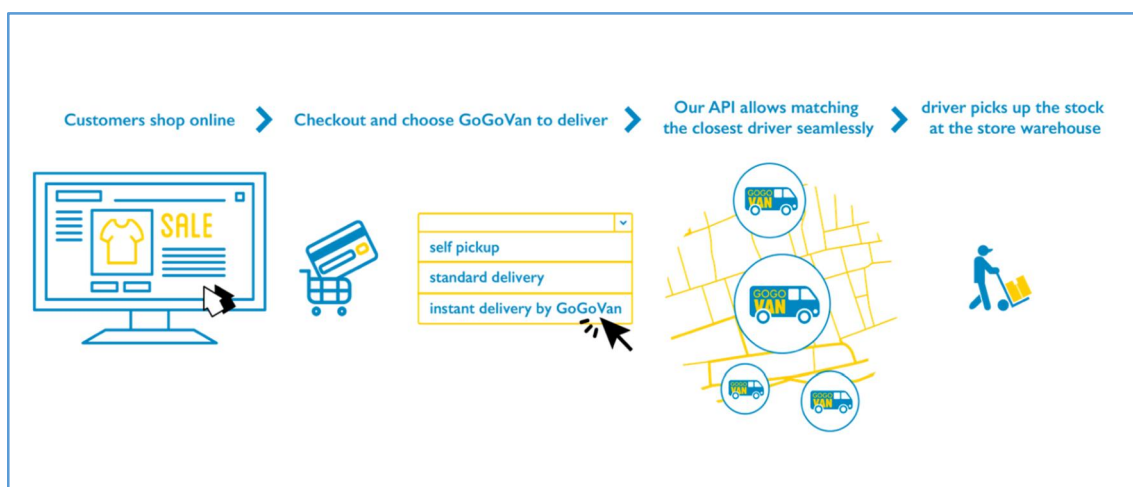

Features include:

- Import bulk orders from excel
- Dynamic Route Optimisation
- Capture goods specification and images
- Enable periodic billing
- Real-time vehicle and order status tracking

With the real-time tracking of drivers, delivery status can be easily notified to customers via SMS or email. Thus, improving the connectivity and communication between customers, drivers and businesses which increases delivery success rate and customer satisfaction. Furthermore, e-signature verification and monthly bill tracking enable a better control of finance.

2. **eCommerce API** is a 'Plug-and-play' program that empowers businesses to enable same-day delivery for customers. Shoppers will be able to receive their purchase within the same day instead of waiting for days. E-commerce businesses will be able to provide a better shopping experience and customer satisfaction with the API integration.

3. **GoGoKiosk** is a standalone fixture available for use in high-traffic locations like shopping malls that enable placing delivery orders instantly via the Kiosk. Businesses can increase customer satisfaction by placing a GoGoKiosk in-store to provide self-service same-day delivery order placement.
